Profile

Software engineer with 9+ years delivering enterprise web applications, working at the intersection of **frontend engineering, delivery quality and automation**. Currently at a regulated fintech, building the Angular SSR frontends and back office, keeping toolchains current (Angular 22, TypeScript 6, Vitest 5), hardening **Azure DevOps** pipelines and building internal on-call tooling on Azure. Expert in TypeScript and the modern JavaScript build ecosystem; comfortable with Docker, Linux and cloud infrastructure. English **C1** (Aptis, 187/200). Seeking a **DevOps / SRE / Quality Engineering** role.

Core Skills

Quality Engineering: Vitest, Playwright (component + integration, browser mode), Testing Library, Jest, Jasmine/Karma, SonarQube, ESLint/Stylelint, pre-commit hooks, code review, test strategy

CI/CD & Cloud: Azure DevOps Pipelines, GitLab CI, Jenkins, Azure (Container Apps, Static Web Apps, Application Insights / KQL, Service Bus, Entra ID), Cloudflare CDN, Microsoft Clarity, pnpm, Docker, Docker Compose, Bash, PowerShell, build troubleshooting and build-time optimisation

Languages & Frontend: TypeScript (expert), JavaScript (ES2023+), HTML5, CSS3/SASS, Angular 7–22 (Signals, standalone components, SSR / hydration, PWA), RxJS, Angular Material, Web Components, React (working knowledge), Vue.js

Backend & Data: C# / .NET 10, ASP.NET Core, Blazor Server, Microsoft Graph, Entity Framework, REST API design, OAuth / MSAL, SQL Server, MySQL, PHP

Infrastructure & OS: Linux (10+ years, daily driver), Proxmox VE, Raspberry Pi, virtualisation, networking fundamentals, Kubernetes (foundational)

Engineering Practices: SOLID, design patterns, clean code, WCAG accessibility, technical mentoring, agile delivery (Azure Boards, Planner, Jira, Scrum), AI-assisted development (Claude Code)

Professional Experience

Senior Frontend Engineer Feb 2026 – Present

SEGOFINANCE — regulated crowdfunding & crowdlending platform (Madrid, remote)

- Main contributor across 7 Azure DevOps repositories (1,300+ commits in 9 months): an **Angular SSR** investor platform serving six business lines from one codebase, the internal back office, two customer portals and the .NET APIs.
- Delivered the back office's largest functional area in incremental releases: debtor and invoice management, a multi-step payment-settlement workflow and a full redesign of the operation record, with typed forms, signals and business rules isolated and unit-tested.
- **Test automation:** brought broken suites back to green (690/690 specs), moved unit tests to **Vitest browser mode on Chromium**, added coverage tooling and pushed key modules above 90% coverage, writing characterisation tests before every refactor.
- **Upgrades:** Angular 21 → 22 across four apps (TypeScript 6, Vitest 5, Material 22, MSAL 6, Node 24); migrated two projects from npm to **pnpm**; SSR fixes (fetch backend, allowed hosts), CSP hardening and removal of `::ng-deep`.
- **CI/CD:** reworked Azure DevOps pipelines to build once and promote the same artifact, moved deployment tokens into secrets, and found a CDN cache-purge step that reported success while failing.
- **Observability:** integrated Microsoft Clarity end to end (opaque user IDs from the .NET API, per-environment config) and built an internal on-call dashboard (.NET 10, Azure Container Apps, Entra ID, Teams) combining pipelines, Application Insights (KQL), Service Bus dead-letters and incident queues.
- On-call rota and releases: incident triage with operations and compliance (payment-provider KYC), production fixes and versioned releases through staging to production.

Senior Angular Engineer / Frontend Architect Aug 2022 – Feb 2026

Zemsania — clients: Netex Learning; Indra / Spanish Ministry of Foreign Affairs

- Owned the automated testing layer of the platform: migrated from a legacy Karma/Jasmine setup to **Vitest with Playwright browser mode**, covering component and integration testing in real browsers.
- Introduced and maintained **quality gates** on both client programmes (SonarQube, ESLint/Stylelint, pre-commit hooks), blocking merges that regress coverage or add code smells.
- Diagnosed and fixed **broken builds and slow pipelines**, shortening the feedback loop between commit and green build for the whole team.
- Designed the frontend architecture of two enterprise products (Angular 14 and 16), built a shared **component library** (Angular 17 + Material) with the UX team and led the **Angular 7 → 14** upgrade of a legacy application.
- Trained colleagues on RxJS, Angular best practices, testing strategy and accessibility standards.

Senior Frontend Engineer Dec 2021 – Aug 2022

Viewnext (IBM group) — client: Jazztel / Orange

- Migrated the customer portal from **Angular 9 to Angular 12**, reducing technical debt and stabilising releases.
- Substantially increased **unit test coverage with Jest** on a legacy codebase, cutting regressions between releases.
- Built **Angular Web Components** reused across the customer web portal and the mobile application.

Senior Full-Stack Engineer / Angular Tech Lead Nov 2018 – Dec 2021

Hiberus Tecnología — public sector

- **Tech lead** for Angular, vanilla JavaScript and CSS3; reference point for code review and architecture decisions.
- Built frontend (Angular 7) and backend (**C# MVC 4.5, EF 6.5, SQL Server**) for **Osasunbidea** (Navarre Health Service), managing temporary hiring lists for public healthcare staff.
- Designed and implemented the candidate ranking and matching algorithms behind those hiring lists.
- Delivered internal **Angular training** across several offices; interim project manager for a small team; certified **SOA developer on PLATEA** (Basque Government).

Earlier Experience

Web Developer Dec 2017 – Nov 2018

NetBrain

- Custom web development with PHP, WordPress plugins and Angular 2; built **UNIR's CITES mobile app** (Ionic, Cordova, Angular) with push notifications.

Full-Stack Developer Apr 2017 – Dec 2017

FUSS S.L.

- Web applications with **Ember.js and CouchDB**; campaign sites for **Samsung** (MadFunFest) and **Kaiku Caffè Latte**.

Frontend & Backend Developer 2013 – 2016

Cloudting.es — alongside the Arsys role below

- **AngularJS** applications with secure session handling; **REST APIs with ASP.NET MVC5** and OAuth; hybrid mobile apps with PhoneGap.

Technical Support & Pre-sales — Hosting Dec 2011 – Mar 2017

Arsys Internet S.L.U.

- Second-line support for domains, DNS, FTP publishing, email and shared hosting; migrated **MySQL databases and WordPress sites** onto Arsys infrastructure; advised customers on **Cloudbuilder** (Arsys IaaS) — early hands-on exposure to cloud infrastructure.

IT Technician (internship) Apr 2011 – Jun 2011

Macopharma — Tourcoing, France

- Maintained the corporate intranet; managed imaging, cloning and rollout of workstations.

Infrastructure Projects (Personal)

- **Self-hosted Proxmox VE lab**: VM and LXC provisioning, backups, networking and service deployment via **Docker Compose** — a sandbox for infrastructure, automation and CI experiments.
- **Raspberry Pi projects** for hands-on Linux administration, services and networking.

Education

Higher National Diploma — Computer Systems Administration (ISCED 5) 2009 – 2011

IES Comercio, Logroño — Windows Server, Linux, LAN networking, Java, Oracle DBA

Higher National Diploma — Computer Applications Development (ISCED 5) 2006 – 2009

IES Comercio, Logroño — programming, SQL Server administration, web development

Bachillerato — Technology track — IES Inventor Cosme García, Logroño 2004 – 2006

Certifications & Training

- **British Council Aptis ESOL — Level 2 Certificate in ESOL International, CEFR C1** (187/200) — Jun 2026
- **PLATEA SOA Developer** — Basque Government development platform — 2019
- **Introduction to Cloud Computing** — IEEE via edX (40h) — 2016; plus Mobile App Programming and Web Development Fundamentals (40h each)

Languages

Spanish — native. **English — C1** (Aptis, 187/200); daily working language. **French** — B1 written / A2 spoken (three months living in France).
